RF Ablation Catheter	
Description	**Product Codes**
Venclose™ RF Ablation Catheter (60 cm)	☐ VC10A256F60
Venclose™ RF Ablation Catheter (100 cm)	☐ VC10A256F100
Generator & Accessories	
Description	**Product Codes**
Venclose™ RF Generator	☐ VCRFG1
Venclose™ Procedure Packs (No Access)	☐ VCPK
7 cm Micro Introducer Sheath	☐ NIS02A
11 cm Micro Introducer Sheath	☐ NIS02
Venclose™ System Foot Pedal	☐ VCFP1
Venclose™ System US Power Cord	☐ VCPCB

[1] As of October 2024.

*Compared to ClosureFast™ Catheter, depending on the treated vein length, the Venclose™ RF Ablation Catheter 10 cm heating length can lower the total number of ablations.

**Data on file. BD, Tempe, AZ. BD Venclose™ RF Ablation Catheter (N=5). The torque ratio was evaluated by testing the amount of rotation of the distal catheter tip when a rotational force was exerted on the handle at the proximal end of the device. Mean torque ratio was μ = 1.00. Bench data may not be indicative of actual clinical performance. Different test methods may yield different results.

The Venclose™ EVRSF Catheter is intended for endovascular coagulation of blood vessels in patients with superficial vein reflux. The Venclose™ EVSRF Catheter is contraindicated in patients with thrombus in the vein segment to be treated. Potential adverse events include but are not limited to the following: vessel perforation; skin discoloration; nerve injury; temporary paresthesia; thrombosis; deep vein thrombosis; phlebitis; hematoma; infection; skin burn; pulmonary embolism; and pain. **Please consult product labels and instructions for use for indications, contraindications, hazards, warnings, and precautions.**
